CASE: <<caseReference>>

IN THE FAMILY COURT
BETWEEN

<<applicantFName>> <<applicantLName>>

Petitioner

-And-

<<respondentFName>> <<respondentLName>>

Respondent

APPLICATION AND COURT ORDER

This is the description, it should really be wrapped but it is not currently. The table limit is 255 characters anyway.

basic_concepts/cursor.rb

We normally write our documents from top to bottom and it is no different with Prawn. Even if the origin is on the bottom left corner we still fill the page from the top to the bottom. In other words the cursor for inserting content starts on the top of the page.

Most of the functions that insert content on the page will start at the current cursor position and proceed to the bottom of the page.

The following snippet shows how the cursor behaves when we add some text to the page and demonstrates some of the helpers to manage the cursor position. The **cursor** method returns the current cursor position.

```
stroke_axis

text "the cursor is here: #{cursor}"
text "now it is here: #{cursor}"

move_down 200
text "on the first move the cursor went down to: #{cursor}"

move_up 100
text "on the second move the cursor went up to: #{cursor}"

move_cursor_to 50
text "on the last move the cursor went directly to: #{cursor}"
```

Text

2001: A Space Odyssey

- Kubrick, Stanley
- United Kingdom
- United States

3-Iron

- Ki-Duk, Kim
- South Korea

Spartacus

Year: 1960

Duration: 184
